

# ABS

## Automatic Bagging System

**NAACS** offers you state of the art **Automatic Bagging System** called **ABS**.

It is an automatic bagging scale that is equipped with electronic gross weighing system to ensure accurate weight measurement on consistent basis.

It is capable of bagging 20Kg to 50 Kg open mouth bag with ease.

The system comes equipped with a HMI Touchscreen that also displays the hourly production of the bagging scale.

The system comes with Twin Speed Filling process wherein the flow speed decreases at the end of the filling process to ensure accurate weight of the bag.

Furthermore, ABS can also give you complete production log of all products with percentage extraction through SCADA.. (Provided our bagging scale is installed at all bagging platforms)

### Features in a Nutshell

- Speed 120 bags of 50kg (approx )
- User- friendly weighing controller with HMI Touchscreen.
- Capable to fill 50Kg/20Kg Open Mouth Bag or as per requirement.
- Automatic Zero Correction, Material in flight compensation.
- Selection of desired weight.
- Hourly production log of one week.
- Pneumatic Operation of Bag Clamp.
- Option of having Complete Production through SCADA.
